Skills

- Software testing theory, test documentation, TestRail, Jira, Confluence
- HTML, CSS, DevTools, Postman, SQL, Git
- Android Studio, TestFlight, TestFairy
- Languages: Russian (native), English B1 (Intermediate)

Experience

2021-2022

- Dividend Tracker (QA engineer)

  The result of my work on the project was the release of a mobile application devoid of many bugs, with user-friendly improvements, with a logo invented by me that reflects the essence of the project.

  - Composed test scenario
  - Developed check lists
  - Performed functional, non-functional and change related testing
  - Organized team interaction through a bug tracking system
  - Localized the bugs and written reports
  - Made UI/UX suggestions that were implemented.

2006-2022

- AO Malakhit (Design engineer)

  - Provided quality of documentation and whole product at all stages of life cycle
  - Developed and checked project documentation
  - Designed and handled ergonomics issues.

Education

2021-2022

- Self Study (online QA testing courses, video guides, books)
- EPAM Training Center (Software testing by Svyatoslav Kulikov, QA engineer)

2001-2007
Master's degree

- Saint-Petersburg Marine State Technical University (Applied mechanics)

Interests

- Traveling, snowboarding, fitness, finance, cooking.
